ALL MOUNTAIN HARDTAIL 2016

DIAMONDBACK

ABOUT ALL MOUNTAIN HARDTAIL

The Myers is a very capable All Mountain hard tail mountain bike designed for your favourite trail centre or bike park. The 6061-T6 butted aluminium frame features custom formed and butted tubes to create a lightweight yet sturdy frameset .

All Myers models feature 27.5” wheels. This wheel size lets you roll easily over obstacles. Combine this with thru axle hubs front & rear, and handling is on point and super progressive.

It's 68 degree head angle improves handling, making it ideal for advanced trail riding, and matched to a 140mm travel Rockshox fork you'll probably forget that you're not riding a full suspension bike.

The Myers rear end is designed using asymmetrical chain stays, this means maximum tyre clearance without using a super wide bottom bracket. The chainstays also have a unique dropped design to minimise chain slap when tearing through rough terrain.

MYERS 3.0

- Frame:** Trail series 6061 alloy butted tubing, tapered headtube, ISCG5 chainguide mounts, stealth dropper post ready, 142 x 12mm dropouts
- Fork:** Rockshox Sector RL, 140mm, Solo Air, TurnKey lockout, tapered steerer, E-15
- Groupset:** SRAM X9 2x10 shifters, SRAM X9 type 2 mid cage rear derailleur, SRAM X7 HC front derailleur, Diamondback 4 arm forged 2 piece with Cr-mo 24mm spindle, 38/24T crankset
