# ABOUT EXPERT HARDTAIL

The Heist range is built to perform faultlessly over the rugged trails ahead. With its All Mountain hard tail styling, 120mm travel forks & dropped top tube for maximum clearance, you can shred the trails all day long.

Like all Diamondback hard tails, the Heist is designed here in the UK for the European climate, offering maximum tyre clearance for muddy conditions. All Heist models feature 27.5” wheels, this size lets you roll more easily over obstacles, combined this with 2.25” width tyres, you can eat up the trails with ease.

The lightweight custom formed 6061-T6 butted aluminium frame is stiff, light and nimble, and the slack head angle allows excellent handling on advanced trails. Direct rear stays maxime your pedal stroke efficiently through the rear wheel drive.

Factor in the durability of the forged rear dropouts, replaceable derailleur hanger and splash guard down tube bosses and you’re sure to love riding this modern day hard tail.

Finally, ensuring you’re not going to be left behind, all Heist models are stealth dropper seat post compatible.
