DIAMONDBACK

ABOUT XC TRAIL

The Lumis carbon 27.5" is built for those who want a top shelf bike to roll with the pros. Roots and rocks, beware!

This XC Trail race-ready platform is dialled from top to bottom and carry a look so sinister they are sure to elevate your heart rate before you even hit the saddle.

The carbon Lumis incorporates our proprietary advanced monocoque molding process technology using the highest-grade carbon. Constructed in the most precise manner, to produce a world-class racing machine that weighs in at only 1150gms. The frame uses a full carbon construction, even down to the thru axle dropouts.

The Geometry is spot on. The top tube slopes slightly provide ample stand over clearance, and a 70° head tube angle and 73° seat tube angle create the perfect XC/trail geometry.

LUMIS 3.0

Frame: ACCG XC MTB carbon monocoque mountain frame, internal cable and hose routing, tapered headtube, Press-Fit 30 BB, 142x12mm carbon dropouts, European mud clearance rear stays

Fork: Rockshox REBA RLT Solar Air, E-15

Groupset: SRAM X9 2x10 shifters, SRAM X9 type 2 mid cage rear derailleur, Shimano XT front derailleur, Diamondback 4 arm forged 2 piece 38/24T crankset
